Contents Volume 210 (1999)

Phenolic metabolites of ecological significance in *Empetrum hermaphroditum* leaves and associated humus
C. Gallet, M.-C. Nilsson and O. Zackrisson **1–9**

Nitrogen uptake and partitioning under alternate- and every-furrow irrigation
R.H. Skinner, J.D. Hanson and J.G. Benjamin **11–20**

A test of a potential short cut in the nitrogen cycle: The role of exudation of symbiotically fixed nitrogen from the roots of a N-fixing tree and the effects of increased atmospheric CO_2 and temperature
S.M. Uselman, R.G. Qualls and R.B. Thomas **21–32**

Mycorrhizae, crop growth, and crop phosphorus nutrition in maize-soybean rotations given various tillage treatments
T.P. McGonigle, M.H. Miller and D. Young **33–42**

Assessing fine-root biomass and production in a Scots pine stand – comparison of soil core and root ingrowth core methods
K. Makkonen and H.S. Helmisaari **43–50**

The influence of intermittent soil drying on growth, cell number, and final cell length in the pith of mature internodes in *Helianthus annuus* L. and *Liquidambar styraciflua* L.
H.E. Sommer, C.L. Brown and H.Y. Wetzstein **51–59**

Carbon (^{13}C) uptake and allocation in pasture plants following field pulse-labelling
D.P.C. Stewart and A.K. Metherell **61–73**

Functional copper requirement for catechol oxidase activity in plantation *Eucalyptus* species
M.J. Gherardi, B. Dell and L. Huang **75–81**

Polyamine-induced changes in symbiotic parameters of the *Galega orientalis–Rhizobium galegae* nitrogen-fixing system
V. Vassileva and G. Ignatov **83–91**

The influence of atmospheric CO_2 enrichment on plant-soil nitrogen interactions in a wetland plant community on the Chesapeake Bay
R. Matamala and B.G. Drake **93–101**

Isolation and characterization of diazotrophic bacteria from banana and pineapple plants
O.B. Weber, V.L.D. Baldani, K.R.S. Teixeira, G. Kirchhof, J.I. Baldani and J. Dobereiner **103–113**

Interactive effects of lettuce (*Lactuca sativa* L.), irradiance, and ferulic acid in axenic, hydroponic culture
S. Caspersen, P. Sundin, M. Munro, S. Aðalsteinsson, J.E. Hooker and P. Jensén **115–126**

Modeling soil–root water transport and competition for single and mixed crops
F. Lafolie, L. Bruckler, H. Ozier-Lafontaine, R. Tournebize and A. Mollier **127–143**

Water-extractable humic substances enhance iron deficiency responses by Fe-deficient cucumber plants
R. Pinton, S. Cesco, S. Santi, F. Agnolon and Z. Varanini **145–157**

Partitioning of P and the activity of root acid phosphatase in white clover (*Trifolium repens* L.) are modified by increased atmospheric CO_2 and P fertilisation
J.P.F. Almeida, A. Lüscher, M. Frehner, A. Oberson and J. Nösberger **159–166**

Aerial photography to determine fertiliser effects on pearl millet and *Guiera senegalensis* growth
B. Gérard and A. Buerkert **167–177**

Overestimation of apoplastic Fe in roots of soil grown plants
O. Strasser, K. Köhl and V. Römheld **179–187**

Contributions to nitrogen leaching and pasture uptake by autumn-applied dairy effluent and ammonium fertilizer labeled with ^{15}N isotope
H.J. Di, K.C. Cameron, S. Moore and N.P. Smith **189–198**

Plant availability of selenite and selenate as influenced by the competing ions phosphate and sulfate
J.L. Hopper and D.R. Parker **199–207**

Seed treatment with growth regulators and crop productivity. I. 2,4-D as an inducer of salinity-tolerance in wheat (*Triticum aestivum* L.)
A. Gulnaz, J. Iqbal, S. Farooq and F. Azam **209–217**

Plant and soil resistance to water flow in faba bean (*Vicia faba* L. *major* Harz.)
C. Ruggiero, S. De Pascale and M. Fagnano **219–231**

Elevated [CO_2], temperature increase and N supply effects on the turnover of below-ground carbon in a temperate grassland ecosystem
P. Loiseau and J.F. Soussana **233–247**

Nutrient interactions of alley cropped *Sorghum bicolor* and *Acacia saligna* in a runoff irrigation system in Northern Kenya
J. Lehmann, D. Weigl, I. Peter, K. Droppelmann, G. Gebauer, H. Goldbach and W. Zech **249–262**

Nitrogen availability and susceptibility of tomato leaves to *Botrytis cinerea*
E. Hoffland, M.L. van Beusichem and M.J. Jeger **263–272**

The effect of regeneration burns on the growth, nutrient acquisition and mycorrhizae of *Eucalyptus regnans* F. Muell. (mountain ash) seedlings
T.M. Launonen, D.H. Ashton and P.J. Keane **273–283**

Volume contents **285–286**

Author index **287**

Instructions for authors **289–294**
